

# Want to save your planet?

**Okay, you might not be Superman, but you could be our local hero.**

**Did you know you can recycle used cooking oils in the same way that you do cardboard, glass, tin cans and clothing?**

Recycling your oil avoids the cost, hassle and smell of blocked drains, not to mention it will help to protect our environment.

We are looking for environmentally-minded people to help set up these collection points, spread the word, or simply drop off used cooking oil. Can you be a local hero?

Find out more about our campaign to get households recycling used cooking oils.
